

Meta Ads Strategy

Facebook & Instagram · Property Owner Acquisition Campaign

Budget: €50 / day · ~€1,500 / month

Why Meta is the Right Channel

Audience Scale	Facebook holds the largest concentration of Airbnb hosts, landlords, vacation rental owners and property investors of any single platform. Millions of property owners are active daily.
Targeting Depth	Interest, behavioural, lookalike and custom audiences allow extremely precise reach to property owners — not just broad demographics. No other social platform matches this granularity for this audience.
Visual Formats	Image and video ads are ideal for property acquisition. A well-photographed property with a clear earning potential message converts at low cost.

No Minimum Spend	Meta works at any budget. €50/day provides strong reach and sufficient data for the algorithm to optimise within 7–14 days.
Full-Funnel Control	Meta runs awareness, consideration and conversion campaigns simultaneously from a single Ads Manager account — no need for multiple platforms at this stage.
Pixel & Retargeting	Once the Meta Pixel is installed on the Travel Staytion host registration page, you own a retargeting audience that compounds in value over time — visitors, partial completions, drop-offs.

Audience Strategy & Targeting

Top of Funnel — Cold Audiences · Reach new property owners who don't know Travel Staytion

Interest targeting · Behavioural targeting · Broad + algorithmic expansion

Middle of Funnel — Warm Audiences · Re-engage people who showed intent

Video viewers · Page engagers · Website visitors (non-host pages)

Bottom of Funnel — High-Intent Retargeting · Convert property owners who nearly signed up

Host registration page visitors · Partial form completions · Drop-offs

Audience 1 — Interest Targeting (TOFU)

- Airbnb hosting & vacation rental management
- Property investment & real estate
- Holiday home ownership
- Rental income & passive income from property
- Home improvement & property renovation

Cold audience · Broad reach · Brand awareness

Audience 2 — Behavioural Targeting (TOFU)
• Users who interacted with Airbnb, Booking.com host or VRBO pages
• Users who clicked real estate or property listing ads
• Engaged with property management content
• Travel enthusiasts who also engage with real estate content
Behavioural · Higher intent than interest targeting
Audience 3 — Lookalike Audiences (TOFU/MOFU)
• 1% LAL from existing registered hosts — highest priority seed
• 1–2% LAL from host registration page visitors
• 1–3% LAL from email list of past enquiries
• Test 1% vs 2–3% to balance precision vs scale
Algorithm-driven · Scalable · Requires seed data
Audience 4 — Page & Video Engagers (MOFU)
• People who watched 50%+ of a property owner video ad
• Facebook Page visitors and post engagers (last 90 days)
• Instagram profile visitors and Story viewers (last 60 days)
• People who clicked "Learn More" but did not convert
Warm audience · Lower CPL than cold
Audience 5 — High-Intent Retargeting (BOFU)
• Host registration page visitors who did not complete sign-up
• Partial form completions and drop-offs (ViewContent event)
• People who visited the host page 2+ times
• Window: last 30 days primary · last 60 days secondary
Highest intent · Lowest CPL · Pixel required
Exclusions — Always Apply
• Existing registered hosts (CRM upload)
• Traveler/guest audiences (interest: booking holidays)
• Recent converters (last 30 days)
Apply to all cold and lookalike campaigns

Campaign Structure

Campaign	Objective	Audience	Ad Format	Daily Budget
----------	-----------	----------	-----------	--------------

Cold Prospecting	Leads / Website conversions	Interest + Behavioural (Audiences 1 & 2) split into separate ad sets	Feed Image · Carousel · Reel	€25
Lookalike Prospecting	Leads / Website conversions	1% LAL from existing hosts · 1–3% LAL from host page visitors	Feed Image · Video (15–30 sec)	€15
Retargeting	Conversions (host sign-up)	Host page visitors + engagers (Audiences 4 & 5)	Feed Image · Dynamic Creative · Story	€10
Total Daily Budget				€50

Once BOFU audiences build after 2–4 weeks, shift €5/day from cold prospecting to retargeting for a lower blended CPL.

Creative Strategy

Format	Placement	Message & Approach	CTA
Feed Image 1080 × 1080 px	FB & IG Feed	Real property photo — not stock. Overlay: "Earn €X,XXX/month from your property." Lead with earning potential. Clean and aspirational.	List Your Property
Reel / Story Video 1080 × 1920 · 15–30 sec	Reels, Stories	Property owner testimonial or walkthrough. Hook in first 2 seconds: "Have a property sitting empty?" Show simplicity of listing. End on earnings.	Start Earning Today

Carousel 1080 × 1080 · 3–5 cards	FB & IG Feed	Card 1: The problem (empty property). Card 2: The platform. Card 3: Three steps to list. Card 4: The earnings. Card 5: CTA.	Add Your Property Free
Story Image 1080 × 1920 px	Stories (BOFU only)	Retargeting only. Urgency: "You were this close to listing your property." Or social proof: "Join X,XXX hosts already earning on Travel Staytion."	Complete Your Listing
Dynamic Creative	All placements	3–5 images, 3–5 headlines, 2–3 descriptions. Meta's algorithm finds the best-performing combination per audience. Best for BOFU retargeting.	Join Thousands of Hosts

Always use real properties — never stock. Lead every headline with earning potential. Test at least 2 creative angles per ad set. Refresh creatives every 3–4 weeks to prevent fatigue.

Bidding Strategy

Campaign	Bidding Strategy	Rationale	Daily Budget
Cold Prospecting	Lowest Cost (auto-bid)	Maximises reach within budget during the learning phase. Allow Meta to optimise before constraining it with a cost cap.	€25
Lookalike Prospecting	Lowest Cost (auto-bid)	Same rationale. Once 50+ conversions/week are recorded, consider switching to Cost Cap at your target CPL.	€15

Retargeting (BOFU)	Highest Value or Cost Cap	Audience is small and high-intent. Set Cost Cap at €20 max CPL once benchmark data exists. Prioritise quality over volume.	€10
--------------------	---------------------------	--	-----

Total Daily	€50
-------------	-----

Learning Phase: Each ad set needs ~50 optimisation events to exit learning. At €50/day across 3 campaigns and an estimated CPL of €8–15, expect learning to complete within 7–14 days. Do not change budgets, audiences or creatives during this period.

KPIs and Success Metrics

Metric	Cold Prospecting	Lookalike	Retargeting	Overall Target
Primary KPI	Host page visits	Host page visits	Completed host sign-ups	Host sign-up conversions
Est. CPL	€10–20	€8–15	€3–10	< €15 blended
Est. Impressions/mo	300K–500K	150K–250K	50K–100K	500K–850K total
Expected CTR	1–2%	1.5–2.5%	2–4%	—
Est. Monthly Sign-ups	30–75	30–60	30–100	90–235 / month

30-Day Optimisation Roadmap

Phase	Days	Actions	Decision Points
-------	------	---------	-----------------

Week 1 Launch	1–7	Install Pixel. Launch all 3 campaigns. Run 2 creatives per ad set. Use Lowest Cost bidding. Do not touch campaigns.	Confirm Pixel is firing correctly on the host registration page via Events Manager. Verify impressions are delivering.
Week 2 Learn	8–14	Monitor frequency — keep below 2.5 for cold audiences. Check which creatives are driving the most link clicks. Confirm ad sets are exiting learning.	If any ad set is stuck in learning, consolidate audiences or increase budget by 20%. Pause creatives with CTR below 0.5%.
Week 3–4 Optimise	15–30	Pause lowest-performing prospecting ad set. Shift €5/day to retargeting if BOFU audience exceeds 1,000 people. Test 1 new creative variation.	If retargeting CPL is below €10, increase its budget. If cold prospecting CPL exceeds €25, test new interest combinations or switch to Advantage+ audience.
