

DSP Platform Evaluation

Property Owner Acquisition Strategy | Budget: €5,000 / Month

www.travelstaytion.com · Prepared by: Performance Marketing Team · June 2026

1 Campaign Brief

Objective	Acquire new property owners who will list their properties on Travel Staytion
Target Audience	Property owners, landlords, vacation rental hosts, holiday home owners, real estate investors and professional property managers
Not the Target	Travelers looking to book accommodation. This is a property supply acquisition campaign, not a demand or booking campaign.
Available Budget	€5,000 per month
Key Message	List your property on Travel Staytion and reach thousands of travelers. Grow your rental income.

Primary KPI	Host registrations and property listing sign-ups on travelstaytion.com
-------------	--

2 Platform Comparison: 10 Channels Evaluated for Property Owner Acquisition

Specific Placement Targeting column:

YesCan target specific sites or communities at this budget LimitedTechnically possible but inventory or granularity may be restricted NoAudience or category based only

Platform	Type	Property Owner Audience Reached	Targeting Options	Key Advantage for This Campaign	Fit	Specific Placement Targeting
Meta Ads (Facebook / Instagram)	Social DSP	Airbnb hosts, landlords, vacation rental owners, holiday home owners, real estate investors on Facebook and Instagram	Interests: Airbnb hosting, vacation rental, property investment, real estate. Lookalike from existing hosts. Behavioural targeting.	Largest concentration of property owners globally. Highly visual formats suit property showcase. Low CPL, no minimum spend.	★★★	No

Google Display Network (GDN)	Self-Serve DSP	Property owners browsing real estate sites, property management blogs, Airbnb host community pages and home improvement content	Custom intent: 'list property', 'vacation rental platform', 'Airbnb alternative'. In-market: real estate. Keyword contextual.	Reaches property owners actively searching how to list and monetise their property. Strong intent signals via Google.	★★ ★★	Limited
GDN Remarketing	Self-Serve DSP	People who already visited the Travel Staytion host registration page but did not complete sign-up	Pixel-based remarketing of host page visitors. Custom audience of partial form completions and drop-offs.	Lowest cost, highest intent. These people already showed interest in listing a property. Follows them across the web to convert.	★★ ★★ ★	No
LinkedIn Ads	B2B Social DSP	Professional property managers, real estate agencies, hospitality operators, vacation rental business owners	Job title: property manager, real estate agent, hospitality owner. Industry: real estate, hospitality. Company size targeting.	Only platform with professional-level targeting. Reaches operators managing multiple properties, agencies and real estate businesses.	★★ ★★	No

YouTube Ads (via Google Ads)	Video DSP	Property owners watching content about Airbnb hosting, rental income, real estate investment, property management tips	Custom intent: viewers of Airbnb host tutorials, real estate channels, vacation rental guides. In-market real estate. Remarketing.	Video format is highly persuasive for property acquisition. Show a 15-30 second ad before relevant property and real estate content.	★★ ★★	Limited
Reddit Ads	Community DSP	Property owners and landlords active in r/airbnb, r/realestateinvesting, r/landlord, r/vacationrentals, r/shorttermrentals	Subreddit targeting: r/airbnb, r/realestateinvesting, r/landlord. Interest and keyword targeting within communities.	Direct access to active communities of property owners and hosts. High trust environment. Users in these communities are actively discussing hosting.	★★ ★★	Yes
Microsoft Advertising (MSAN)	Search and Display DSP	Property owners and landlords researching via Bing, MSN real estate sections, Microsoft News property content	Search intent: 'list vacation rental', 'add property to booking site'. Display via Microsoft Audience Network on real estate content.	Bing skews toward older, higher-income users: a strong demographic for property ownership. Lower CPC than Google due to less competition.	★★ ★★	Limited

Quora Ads	Intent-Based DSP	People actively asking questions about listing properties, vacation rental platforms, Airbnb alternatives, earning from holiday homes	Question targeting: 'How do I list my property?', 'Best vacation rental platforms'. Topic targeting: real estate, property management.	Reaches property owners at the exact moment they are researching where to list. Unique intent signal: they are asking the question Travel Staytion answers.	★★ ★★	Yes
Taboola	Native DSP	Property owners reading real estate content, rental income guides and investment articles on major news sites	Contextual targeting: real estate, property investment, rental income, home ownership content topics	Reaches property owners while they are reading relevant content. Native format blends into editorial naturally. Good for awareness.	★★ ★	No
Outbrain	Native DSP	Property owners reading real estate or rental income content on premium European news publishers	Contextual targeting: real estate, property rental, investment topics. Strong European publisher coverage.	Good for reaching property owners in key European Travel Staytion markets via premium news editorial content.	★★ ★	No

3 Recommendation: Best Platforms for Property Owner Acquisition

1	Best fit overall	Meta Ads (Facebook / Instagram) - The strongest platform for reaching property owners. Facebook has the largest concentration of Airbnb hosts, landlords and vacation rental owners globally. Interest and behavioural targeting is highly precise. Lookalike audiences can replicate existing hosts. Low CPL, visual ad formats work well for property. Works at any budget with no minimum.
2	Must run alongside any other platform	GDN Remarketing - Install a pixel on the Travel Staytion host registration page from day one. Any property owner who visited but did not sign up will see follow-up ads across the web. This is the lowest cost conversion tactic available and should always be running regardless of which other platform is chosen.
3	Best for high-value hosts	LinkedIn Ads - Ideal for reaching professional property managers, real estate agencies and hospitality operators who manage multiple properties. Higher CPC than Meta but audience quality for professional operators is unmatched. Strong for acquiring hosts with large property portfolios.
4	Best for specific placement and community reach	Reddit Ads - Direct access to active communities of property owners: r/airbnb, r/realestateinvesting, r/landlord, r/shorttermrentals. Subreddit targeting means your ad appears exactly where property owners are already discussing hosting. High relevance, low cost.
5	Best for high-intent search moments	Quora Ads - Reaches property owners at the exact moment they are asking where to list their property. Question targeting on queries like 'Best vacation rental platform' or 'How do I list my holiday home' puts Travel Staytion directly in front of the most ready-to-convert audience available at this budget.
6	Good supporting channel	YouTube Ads - Property owners actively watching Airbnb hosting tutorials, rental income guides and real estate investment videos are a well-defined and reachable audience via Google custom intent. A 15-30 second video ad before relevant content is persuasive and memorable.

4 Creative Direction and Ad Formats

Format	Dimensions	Platform and Notes
Facebook Feed Image	1080 x 1080 px	Meta Ads. Square image of a real property with overlay text: Start Earning From Your Home. Priority #1.

Instagram Story / Reel	1080 x 1920 px	Meta Ads. Full screen vertical. Show a property owner explaining how easy it was to list. High engagement.
YouTube Pre-Roll	16:9 video, 15-30 sec	YouTube Ads. Hook in first 5 seconds: 'Have a property sitting empty?' Skip-resistant message.
LinkedIn Single Image	1200 x 627 px	LinkedIn Ads. Professional tone. Highlight earnings potential for property managers. Show dashboard or stats.
Reddit Promoted Post	1200 x 628 px	Reddit Ads. Conversational tone. Must feel native to the community. Avoid corporate language.
GDN Medium Rectangle	300 x 250 px	GDN Remarketing and Custom Intent. Priority retargeting format for property owners who visited the host page.
GDN Leaderboard	728 x 90 px	GDN. Desktop placements on real estate and property management sites.
Quora Image Ad	1200 x 628 px	Quora Ads. Appears next to questions about vacation rental platforms. Direct headline addressing the question.
Native Card	1200 x 628 px	Taboola and Outbrain. Headline addresses property owners: Turn Your Property Into Income. Earn More From Your Home.

Message to property owners: Focus on earning potential and simplicity of listing. CTAs: "List Your Property", "Start Earning Today", "Join Thousands of Hosts", "Add Your Property Free". Use real properties, not stock imagery. Highlight how easy and fast the sign-up process is.

5 KPIs and Success Metrics						
Metric	Meta Ads	GDN Remarketing	LinkedIn	Reddit	Quora	YouTube

Primary KPI	Host registrations	Completed sign-ups	Property mgr leads	Host page clicks	Sign-up conversions	Host page visits
Est. CPL	€5-15	€3-10	€40-80	€5-20	€5-15	€8-20
Est. Impressions/mo	400K+	200K+	50K+	100K+	50K+	250K+
Expected CTR	1.5-3%	0.5-1%	0.4-0.8%	0.5-1.5%	1-2%	View rate 25-40%
Audience quality for this brief	Very high	Very high	High for professionals	High in communities	Very high intent	Medium-high

6
Next Steps

1	Install Pixels Now	Place the Meta Pixel and Google Ads tag on the Travel Staytion host registration page immediately. Required for all remarketing. This should happen before any campaign launches.
2	Select Primary Channel	Review Section 3 and align on the primary platform. Recommendation: start with Meta Ads for volume and GDN remarketing from day one.
3	Build Audiences	Meta: interest audiences (Airbnb hosting, vacation rental, property investment) and lookalike from existing host list. LinkedIn: job title and industry. Reddit: select relevant subreddits.
4	Brief Creative Team	Produce property owner focused creatives (see Section 4). Priority: Facebook Feed 1080x1080 and GDN 300x250. Use real properties, not stock images.
5	Launch Target	July 2026. Meta Ads, GDN and Reddit can go live within 1 week. LinkedIn and Quora within 1 week. YouTube requires video asset.
6	30-Day Review	Measure cost per host registration per platform. Shift budget to the channel delivering the lowest CPL. Drop any channel above €50 CPL after 30 days.
